'Our objective is to design and install quality, stylish products with the minimum of fuss and with the maximum impact. Home enhancement can be easier than you think.'

Your home is probably the most expensive investment you will ever make, as it plays an important role in your life. It is true to say that home improvements are often necessary to maintain the appearance and the value of your property. Aside from which, you will be proud of your home for years to come.

Having made the decision to improve your home with new windows, doors or perhaps a conservatory, the next decision is choosing the right company. After all, you have to live with that decision for many years. Have confidence.

What you need is a local company with a good reputation. A company that can take on the whole project from advice to surveying, to manufacturing and finally installing, giving you assured quality from start to finish.

You need a company that is competitively priced, experienced in all aspects and has a comprehensive portfolio of local installations. You need a company that only installs quality products and offers a 10 year, insurance-backed guarantee.

AMAZON

the best performing windows that money can buy

We all want the best from replacement double glazing. That's why our windows stand apart. From styling to performance to saving energy, the advanced design gives you a comfortable, secure, energy-efficient home.

THE NEXT
WINDOWS
YOU CHOOSE
COULD REDUCE
WASTED HOME
ENERGY BY UP
TO 20%

Our windows make more of ambient heat

In winter, the energy efficient coated glass used in our windows retains warmth within the home. It's also designed to exploit radiant heat energy from the sun. These properties result in significant fuel savings compared to a single glazed dwelling.

Replacing single glazed... Could save...

changing timber framed windows to our energy rated windows saves:

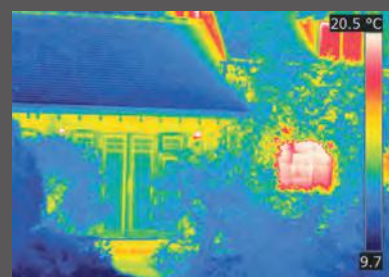

£140.00
(0.72 tonnes CO₂)

changing aluminium framed windows to our energy rated windows saves:

£321.00
(1.65 tonnes CO₂)

Average gas heated bungalow/semi.
GGF carbon calculator @ 2% inflation.

Right: The images show just how effective fitting energy efficient windows to your property can be. The right hand side of the property still has the original windows – the reds and pinks show heat escaping. However, the new extension on the left is fitted with energy efficient windows, the lack of reds and pinks proving they help dramatically reduce heat loss.

If the windows in your home consist of single glazed or older double glazed units, replacing them with our energy efficient windows will save you money. It can reduce the energy you need to heat or cool your home by up to 20%.

Energy efficient windows at the right price

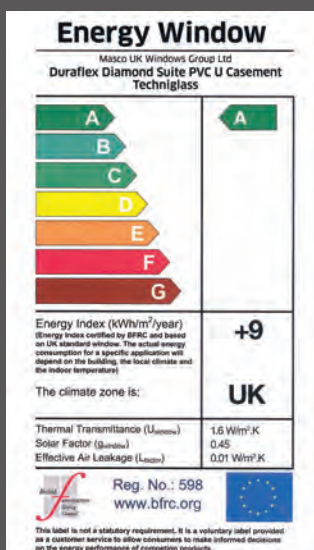

Our energy efficient window system brings together market leading components to deliver exceptional performance. This means quality performing glass and the best performing 'warm edge' spacer technology is used in the sealed unit. Our window profiles include Q-Lon weather seals, multi chamber construction, high security locking and stainless steel hinges.

Reduce wasted energy. Cut bills.

Choosing our windows to replace single glazed or older double glazed units saves money from day one. In fact, it could reduce your heating costs by up to 20% - perhaps worth up to £321 a year.

Reduce condensation and noise.

Lower heat loss at window edges makes our glass 3-4°C warmer - cutting condensation by up to 80%. Using high performance gaskets, our double glazing reduces noise pollution, too.

Using less energy means less CO₂

Science suggests man-made emissions play a major role in global warming and, in turn, influence climate change. Home energy use alone accounts for 27% of UK carbon dioxide (CO₂) emissions which contribute to climate change.

The Glass and Glazing Federation calculates that if all UK replacement windows installed were B and C rated, each household could save the energy equivalent to making 34,000 cups of tea!

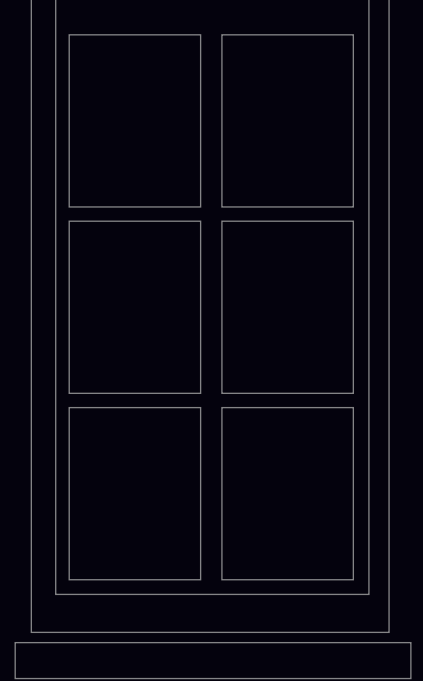

All our Energy Efficient windows achieve C rated or better energy efficiency. Put simply, they're the most energy efficient windows your money can buy. Decide what A, B or C rated performance you want; we'll do the rest.

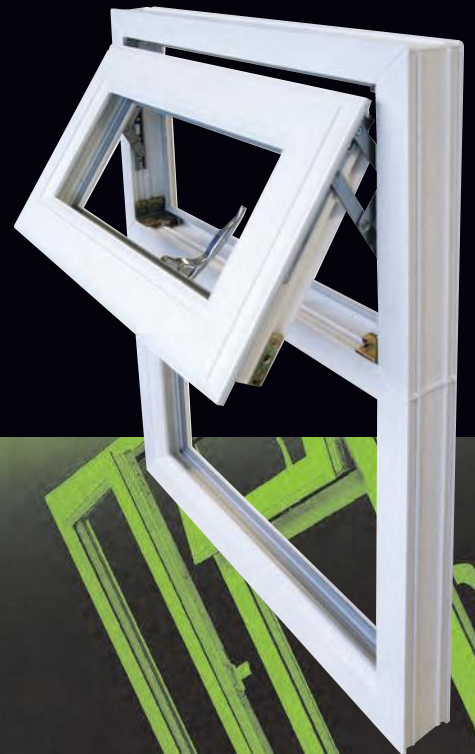

Beauty and durability in one

New windows can enhance the look of your home, both from the inside and out. We offer a wide range of styles to suit all types of properties.

Opt for traditional white frames, or a natural woodgrain effect in golden oak, rosewood or mahogany. Then decide if you'd like Georgian, stained, diamond lead or bevelled glass. Whatever style you go for, you'll find our windows aren't just pleasing on the eye, they're practical too. Minimal maintenance means their good looks will last well into the future.

20%

If your windows consist of single glazed or older double glazed units, replacement with energy efficient windows will save you money. It can cut the energy you need to heat or cool your home by up to 20%.

You could also:

- Reduce condensation in your home
- Reduce your carbon footprint
- Reduce your energy bills
- Add value to your property

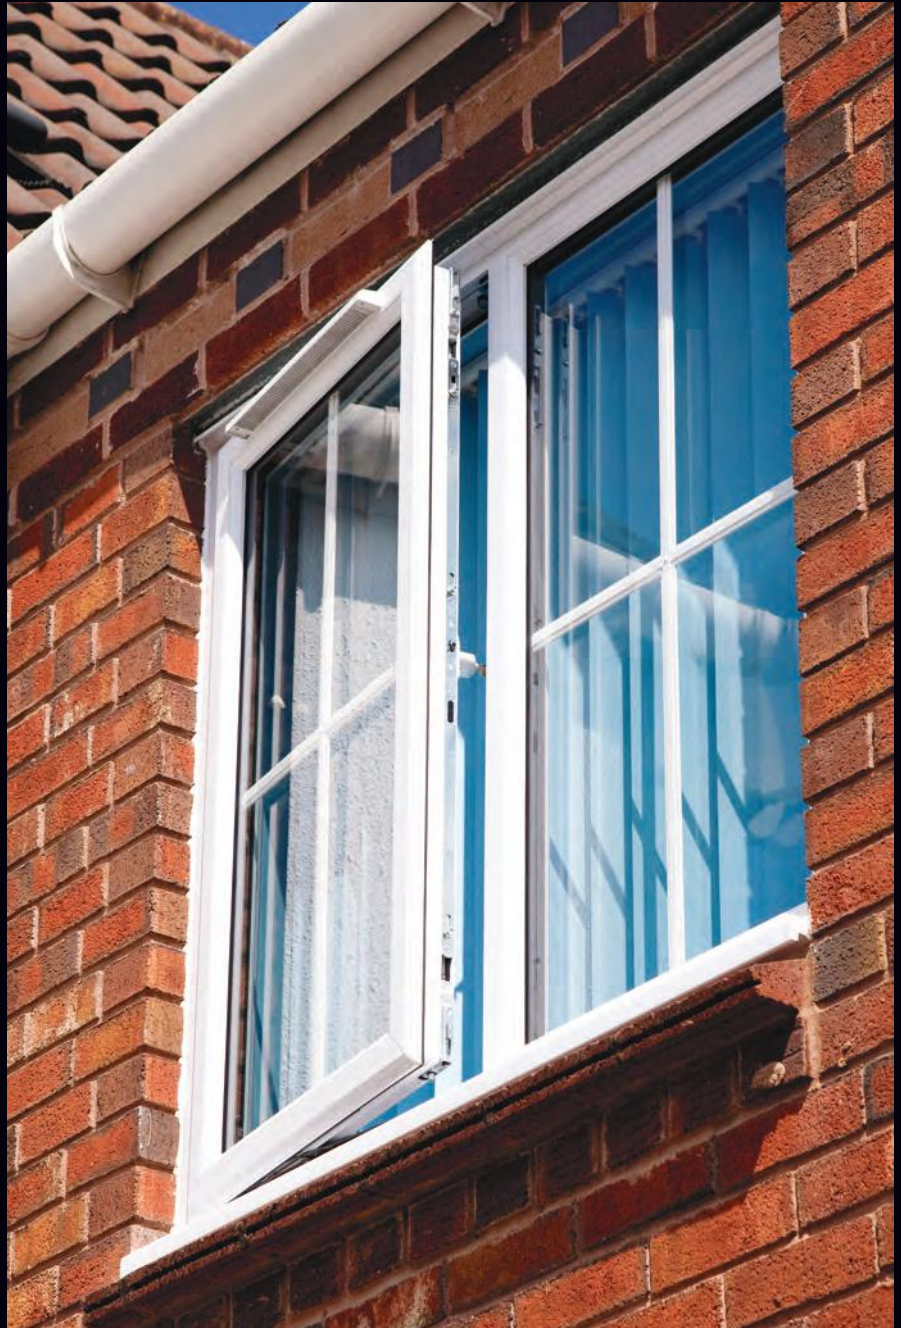

case open case closed

The highest-performing windows and doors - we wouldn't put our name on anything else.

Our range of casement windows is our most popular design, offering security, energy efficiency and is available in a multitude of styles and finishes to enhance the look of your home.

Whatever style you go for, you'll find our casement windows aren't just pleasing on the eye, they're practical too. Minimal maintenance means their good looks will last well into the future.

Features and benefits

All our casement windows feature- energy efficient glazing and our unique high performing Q-Lon weatherseal ensures your windows will perform year after year.

Other key options include;

- Extensive choice of designs.
- Available in a variety of foiled finishes, both woodgrain and solid colours.
- Range of handle colours to complement the finish of your windows.
- Wide range of glass designs, from leaded to Georgian bars.

REDUCE
CONDENSATION
IN YOUR HOME BY UP TO
80%

Whenever we cook, bathe or even breathe, we increase water vapour in our home. When saturated air contacts a cold surface, condensation forms, promoting bacterial growth and mould. Both can compound respiratory problems such as asthma.

Our windows are typically 3-4°C warmer than those with metal spacer bars, reducing condensation by up to 80%.

"CHOOSE ATTRACTIVE, DURABLE
AND WEATHER RESISTANT
WINDOWS THAT COMPLEMENT
THE REST OF YOUR HOME"

always turns out nice

tilt and turn windows

The Tilt and Turn window allows you to enjoy the benefits of a truly versatile product, offering both aesthetic and practical options. This design of window is available in a number of style options, all allowing larger opening areas to be achieved, thus this product can be used for fire escape openings.

Versatile and convenient

Tilt and turn allows you to tilt the window inwards, for ventilation, or alternatively open fully inwards which allows for easier cleaning. Furthermore, this product can also be incorporated within bay and bow style windows and is available with a variety of glazing options, including Georgian bar, leaded lights and obscure glass.

Suitable for both replacing existing timber sliders in period buildings and adding character to any development, vertical sliders retain all the traditional features of their familiar counterpart but with the enhanced benefits that modern PVCu systems provide.

vertical slider windows

The vertical sliding sash window range combines the elegance of traditional sash windows with the benefits of modern materials. Manufactured from PVCu they are strong, will not rot, warp or require repainting; ensuring that they retain their colour and shape throughout the years with the minimum amount of maintenance.

get in shape

bay and bow windows

Attractive, durable and versatile, our bays and bows will suit any style of property and provide valuable extra space in your home.

Bay Windows

Bay windows retain the traditional look of your home creating space, character and allowing light to flood your room.

Bow Windows

Our bow windows offer you the versatility of creating the illusion of space and depth by allowing more light into your home without the need for additional building work.

REDUCE OUTSIDE NOISE LEVELS

with our state-of-the-art windows and doors

Nowadays it's difficult to avoid external noise.

Whether you live near a major road, under a flight path or near some vocal wildlife, noise pollution can be a cause of major disruption. With double-glazed insulation and our high performance window seals, our energy efficient windows will help reduce external noise pollution.

design options

It's the detail that counts.
Make your mark with our design
options - creating your own individual style.

Georgian Bar

This style option allows you to tailor your window glazing to create a personal finish for your home. This is achieved by inserting a shaped bar in between the glass panes.

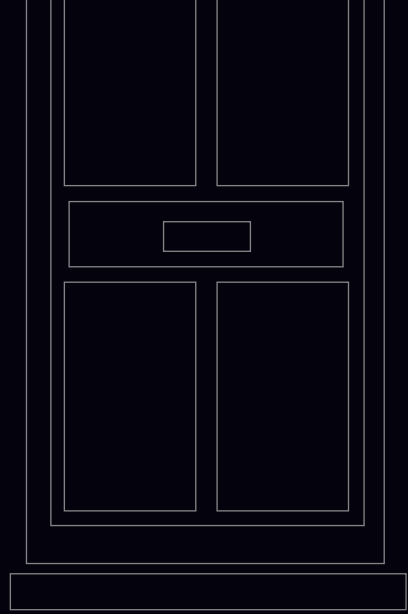

Astrical Bar

Similar to Georgian bars but offers a more traditional finish by planting shaped bars on top of the glass panes thus creating depth to the design and the look of individual glass units.

Mock Horn

Our Mock Horn feature enhances the aesthetics of your windows by achieving the appearance of a traditional vertical slider.

a door range to
enhance the look
of your home

adore

Combining high quality materials with first class performance and security - you can be assured our doors will give you peace of mind and an individual look to suit your home.

The right front door can create a great first impression when you enter your property. Patio, French-style, bi-fold doors are a great way to open up a room – and invite the outside in. We offer all these options in a wide range of finishes – from PVCu doors to composite ones, from simple glazed designs to more ornate styles, with decorative glass or panelling. As well as being beautifully made, each door is designed to stand the test of time. So they not only work superbly as a barrier, they also enhance your home too.

"a range of doors in
styles and colours
to suit every taste"

making an entrance

Our composite doors combine modern materials and performance with traditional looks to enhance the character of your home. Available in a wide variety of styles, colours and glass choices, they're designed to meet your every need.

composite doors

PVCu Panel doors offer a wide range of designs and finishes. These can include full and half panel designs as well as sidelight options.

a contemporary twist

Think outside the box. The front door takes on the fresh new world of modernity, breaking the mould literally and creating a look that sets any property apart.

trench doors

vive la france

Throw open French doors and invite the garden, terrace, balcony or country views inside. A breath of fresh air for your kitchen, lounge or dining room, these beautifully made doors come in a range of styles, colours and finishes to blend naturally with any home.

you need to get out more

Bring the garden closer to the house and use it like another room. With easy access in summer and a wonderful view in winter, a patio door adds light and air to life – all year round.

open up to the big wide world

bi-folding doors

Bi-folding doors are the ideal way to provide extra space and connect inside living to the outside world. They can create a whole new feel for your home, linking rooms together and seamlessly joining inside living with outside space.

Versatile and aesthetically pleasing, bi-fold doors are the ideal replacement for existing patio or French doors to flood any room with natural light. Amazingly flexible, bi-fold doors can be fully opened, partially opened or totally closed, depending on the amount of space available.

The finishing touch is the blinds you choose adding privacy to security. Internal blinds are the perfect solution; in a full range of colours these blinds can be operated manually or by remote control.

a brighter way to extend your home

the amazon conservatory

Most of us would love more space and light in our homes – and there's no better way than a quality conservatory.

Conservatories offer more benefits than you might think. They don't just provide lots of extra room – our insulation means your new conservatory will retain heat in the winter, and won't be too hot in the summer. So it's a comfortable space for you to enjoy all year round. With a variety of styles to choose from – ranging from contemporary to more classic designs – you're sure to find just the right way to bring the garden into your home... and your home into the garden!

practicality meets flexibility

the amazon conservatory

Forget everything you think you already know. Our advanced conservatory technology and materials change everything. Prepare to be inspired...

Want a room you can genuinely use all year round – through the hottest summer or the coldest winter?

Set your mind on creating something really different?

Facing a challenging or unusual footprint to create your new space?

Keen to exploit the lifetime savings available from thermally efficient glass?

Classic

Dwarf walls and traditional perimeter glazing. The versatile, affordable solution for any home

Classic Plus

Take a Classic Conservatory to the next level. Explore full-height walls and bespoke roof designs.

Loggia

Bring in solid in-fill panels, feature surrounds, and architraves to create a classic Italian theme.

Glass Extension

Minimalist, contemporary, spacious and light. Be adventurous with bespoke construction and glazing.

Orangery

Renaissance grandeur, recreated for you. Beautiful detailing, high, ornate glazed roofs and full height walls.

there's nothing
to beat that feeling
of clear blue skies.

Make the most of your views. Come rain or shine, let your new conservatory bring the natural beauty inside.

choose your style & shape

Our five conservatory pathways are just the start. Once you've selected the broad look you're after, the style and shape options bring the detail to life.

From classic traditional styles like Victorian and Georgian to cutting-edge constructions like Glass Extension, you have complete control of the fine detail.

Styles

Once you have a conservatory pathway in mind, it's time to think about the style and shape

Victorian

A popular style distinguished by a faceted front, giving a curved appearance. A particular favourite with period properties, however it's clean lines make this a winner on any type of home.

Edwardian

A flat-fronted style that offers excellent use of floor space due to the square or rectangular internal shape. Its sloping roof and contemporary style is suited to the majority of properties.

Gable

A gable-fronted conservatory adds a sense of grandeur to any home. Featuring the same rectangular floor space as a Georgian, a gable offers excellent use of internal space.

Lean-To

For properties with little room under the eaves or for those homeowners that prefer a clean simple look, a Lean-To conservatory is the ideal choice. The roof pitch can be varied offering versatility and flexibility.

Shapes

Lantern

The 'original' conservatory style offering a feel of drama and grandeur. Distinguished by the two tiered feature roof, the height within a Lantern adds an extra dimension to the feeling of light and space.

T-Shape

A combination style distinguished by a central projection that can either be a Victorian, Gable or Georgian. Offers a large and versatile floor space, an impressive addition to any home.

P-Shape

A P-Shape can combine a Lean-To and Victorian to create a versatile and visually stunning open space. This style is better suited to larger properties, giving an impressive result

Custom

Although the shapes and designs shown are all bespoke, you may have your own 'one-off', exceptional or unique idea. The doors, windows and roof systems in this brochure combined with our expertise should allow you to achieve that dream.

Classic timeless & stylish

The key to the Classic is practical simplicity. With a timeless appearance and infinitely variable footprint, door and window configuration, the Classic suits properties large and small, old and new.

Personalise your conservatory

Tailor any conservatory to your needs with our range of doors and windows.

- Bi-fold doors
- Patio doors
- Double and single doors
- Casement, vertical sliders and tilt and turn windows

Optional extras

Select from our great value options.

- Downlighters
- Roof vents
- Tie bars

Classic plus exclusive refinement

Classic Plus takes the Classic Conservatory to the next level. An ingenious perimeter roof pelmet accommodates downlighters, providing a focal anchor around the entire perimeter of the conservatory. The system can also accommodate brick columns and dwarf walls. To enhance the roof space, adding tie bars can create the appearance of a traditional Orangery – at a fraction of the cost.

What's more, the Classic Plus roof is available to upgrade an existing conservatory. Most conservatory types are suitable, and the upgrade transforms an existing structure with minimum disruption and cost. Ask your advisor for details.

alternative thinking

If a glass roof isn't for you, then consider the alternative. Our Guardian solid conservatory roof is a serious consideration as it offers 10 times more energy efficiency than a traditional conservatory and comes with a 40 year amazon guarantee. The guardian is also the perfect replacement roof for existing conservatories.

amazon solid roof conservatory

after

the amazon guardian solid roof

Warmer in the winter, cooler in the summer.

Transform your standard conservatory with a Guardian Solid Roof from Amazon and you'll notice the difference as the seasons pass. Often a south facing conservatory can be too hot in the summer and equally a north facing conservatory will be hard to heat and maybe unusable in the depths of winter due to heat loss through the roof.

create a room you can use 365 days a year!

The Guardian Solid Roof looks fantastic both inside and out, with a huge choice of finishes to coordinate with the current roof style of your home. The other great benefits, apart from the cost saving on energy, is the noise level is kept to a minimum - we've probably all sat under a traditional conservatory roof when it's been raining! Of course, the Guardian roof can also replace existing tiled roofs as well and the benefit here is that Guardian is the cost effective and lightweight alternative.

Guardian Solid Roofs:

- Cost effective alternative to traditional roof tiles
- Ideal replacement for an existing conservatory roof
- Up to 90% warmer in winter
- Significantly cooler in summer
- Maximise the usage of your conservatory
- Vastly reduces rain and wind noise
- Dramatically reduces heating bills
- 0.16w/m2K U Value, 10 times more energy efficient than a normal conservatory
- Building Regulations approval
- Structural integrity
- Manufactured and installed in seven days
- 40 Year Guarantee

**Choose the design
that suits your home -
be it Victorian,
Edwardian,
a lean-to, an apex
or something very
contemporary -
you'll find we have
the roof for you.**

Internally there's a great choice of finishes to your ceiling. You can go for a traditional plastered finish or be adventurous with a timber or uPVC cladding to create a real WOW factor. Any ceiling can be fitted with lighting - from small LED downlighters to a chandelier if you so fancy. And if your concerned about compromising on the light you get through your current conservatory roof, you can also opt for opening roof vents.

Decking High performance anti-slip wood/composite decking. Enhance your living experience with our natural-look range.

The roofline of a property can often be the last thing you think about when improving your home. The eye is not necessarily drawn upwards as you approach your home but the transformation that is made when improving this area can be quite remarkable.

Traditionally, this area is manufactured from timber, which can be particularly vulnerable to the elements and can require continuous and costly maintenance. The required maintenance is rarely performed to due height and access difficulties.

Here at Amazon, we have been supplying and installing soffits, fascias, cladding, guttering and downpipes for over twenty years and as such, have become experts in this area. Let us take the headache out of roofline maintenance by installing maintenance free UPVC roofline systems in a range of colours and finishes to suit your home

Fascias, soffits and associated roofline accessories are essential components for any property. Exposed to the elements and playing a crucial role in protecting the roof space and rafters, these vital products need to be:

- **Hard-wearing**
- **Weather resistant**
- **Long-lasting**
- **Low maintenance.**

All Amazon roofline products meet these requirements ensuring that will be one part of your house maintenance you will not have to worry about for years to come.

Amazon PVCu cladding provides an attractive, low maintenance, weather resistant solution for replacing rotten timber cladding, concealing problem areas of brickwork or adding an interesting new feature to your property.

Available in shiplap or open V-styles, our cladding is designed for easy installation with a simple clip together fitting system. Our range of colours and realistic woodgrain finishes means you can create a truly unique appearance, whether you want a rustic timber-effect or a crisp, clean, contemporary white finish.

roofline & cladding

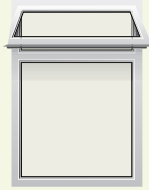

The PVCu soffits, fascias, cladding, guttering and downpipes all conform to all the relevant British Standards for durability, colour-fastness, physical performance, section weight, flatness, thermal movement, fire resistance and impact resistance.

amazon techspec

Windows

from casement to modern tilt and turn, a style to suit every home.

CASEMENT

Casement

Casement windows consist of outward opening sashes and fixed lights. This most common product is available in a multitude of styles and various finishes. Sashes can open as side hung or top hung to suit application.

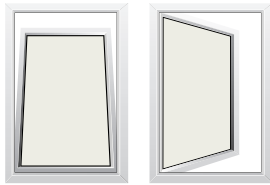

Options

Mock Horn is an option to top hung casements. The bottom of the sash has an extruded feature to give the appearance of a Vertical Slider. Can only be incorporated in top hungs that include a fixed light below.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

TILT AND TURN

Tilt & Turn

Tilt & Turn windows consist of opening in sashes, which can be operated in two ways. Turn handle 90° to tilt top inwards with restrictors, turning handle a further 90° to open fully inwards, hinged on the side for access and cleaning. Available in a multitude of styles and finishes.

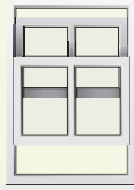

Options

Mock Horn is an option to top hung casements. The bottom of the sash has an extruded feature to give the appearance of a Vertical Slider. Can only be incorporated in top hungs that include a fixed light below.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

VERTICAL SLIDERS

Vertical sliders

Our Vertical Slider combines traditional design with modern technology, available with a range of Georgian bars to create the required look. Both sashes slide vertically to open. They can also be tilted inwards for ease of cleaning.

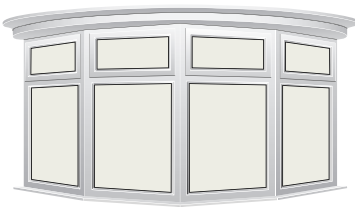

Options

Vertical Sliders are supplied as single products but can be coupled to any other product to achieve the required look, this includes box bays and multiple coupling.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

BOW WINDOWS

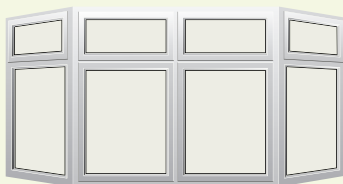

Bow windows

Our Bow windows offer you the versatility of creating the illusion of space and depth by allowing more light into your home without the need for additional building work.

Options

Similar in appearance to a bay window which projects beyond the brickwork. However, the actual brickwork face remains flush with the main building structure. This type of window does not allow a person to walk into the bay area. Commonly, available on 3, 4 and 5 segments.

BAY WINDOWS

Bay windows

Bay windows retain the traditional look of your home creating space, character and allowing light to flood your room.

Options

When three or more frames are fixed together and they project beyond the main face of the building. The brickwork above and below follows the contour of the actual window frames. Therefore allowing a person inside the building to walk into the bay area. Box bay is when the side windows are at 90 degrees to the front. Variable bay incorporates the side windows at an angle that allows them to be seen from the front.

Doors

practical, stylish and secure.

Front doors

Of PVC construction, combining versatility in design with modern lock technology. Available to open inwards or outwards. A variety of styles are available which includes side light option, panel styles and glass types. Various solid colour and woodgrain finishes are available.

Options

To allow greater versatility all of our panel doors are available with a low threshold for easy access. Please see picture right. Doors - practical, stylish and secure.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

FRONT DOORS

Composite doors

Combining the traditional look of timber with modern high performance materials to produce a range of traditional door styles in a variety of solid and wood effect finishes.

Options

For additional styles and variations please refer to our composite door brochure.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

COMPOSITE DOORS

French doors

Of PVC construction, combining versatility in design with modern lock technology. Available to open inwards or outwards. A variety of styles are available which can include midrails. French doors can also be designed with side panels to span larger openings.

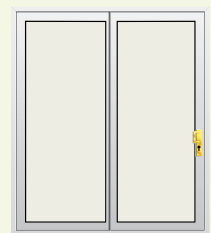

Options

A variety of full and half panel styles, or most popular full glass are also available.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

FRENCH DOORS

Patio doors

In-line PVC patio doors are ideal when opening area is at a premium as the sashes do not encroach into the surrounding space. Available in 2, 3 and 4 pane options, patio doors can even be supplied with a midrail to include a letterplate if required.

Options

Vertical Sliders are supplied as single products but can be coupled to any other product to achieve the required look, this includes box bays and multiple coupling.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

PATIO DOORS

Bi-Fold doors

Designed to fully maximise any opening space, bi-fold doors are available from 2 to 6 panes in a variety of opening sequences to suit your needs. Larger styles can incorporate single or even double opening doors for day to day practical use.

Options

There are numerous bi-fold door styles from 2 to 6 panels with various opening combinations. Aluminium bottom track for improved operation.

Performance

All products manufactured to meet weather performance and operational and strength characteristics as specified in British Standard BS6375 Parts 1 and 2.

BI-FOLD DOORS

safe & secure

Not only do all our doors meet industry standards, but we also work closely with the police under the 'Secured by Design' scheme to make sure our customers enjoy the best possible protection and peace of mind.

So, whether it's our security hinges or our state of the art locking system, our dedication to security is second to none.

The key benefits

- 10 point locking system for maximum security and peace of mind.
- 4 pre-compression rollers allowing door to seal prior to hooks engaging for smooth operation.
- 3 opposing steel hooks to maximise strength.
- 2 anti-lift bolts preventing door lock being dislodged from keeps.
- 1 centre latch for ease of day to day operation, incorporating dead-lock action when bolts and locks are engaged for added security.

Doors are at the heart of your home's security, and we design our products to ensure that visitors to your home are only the welcome ones.

window security you can rely on

Hard wearing, durable windows – it's all in the design. However important windows are to the style of your house, the security they offer is even more important. The more confident you feel inside your home, the happier you'll be.

Our SAC shootbolt

locking system is specially designed to improve security and performance. It also takes pressure away from the hinges, ensuring a longer life for your windows. The tight seal guarantees superb weather protection too, so you'll feel safe and secure in every way.

The key benefits

- 8 Point locking system with unique corner drive design on all windows regardless of size.
- Unique full depth Eurogroove lock-out design to maximise security performance.
- 400% more shootbolt contact area with keep when compared to traditional flat shootbolts.
- Supaglide gear box action, tested to 100,000 cycles (equivalent to 30 years of heavy use).
- Rigorously tested to BS7950 and beyond to achieve Secured by Design status.

glazing

A vast array of glazing options are available including Georgian, patterned, Stained and Leaded.

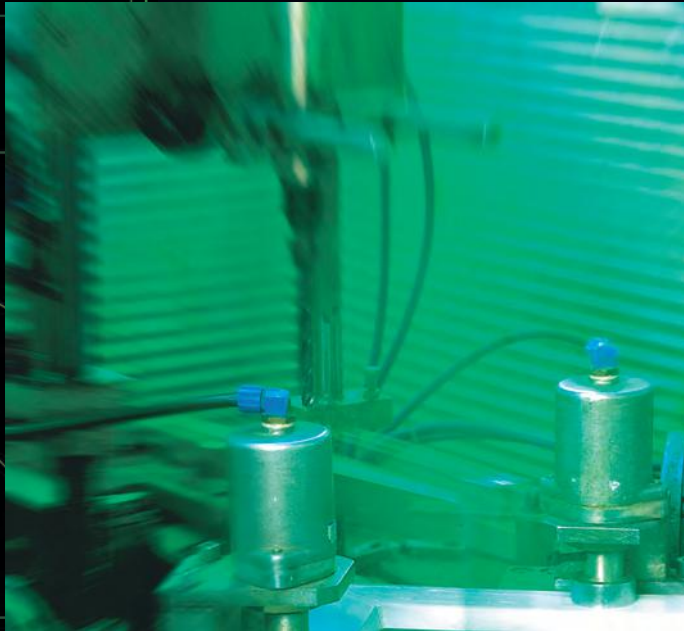

furniture

An attractive range of door furniture available in a selection of finishes

amazon the works

Once you have decided on the product you want, the process commences. One of our experienced surveyors will visit your home and produce a full specification for the factory. The surveyor is responsible from his first visit through to the installation, so you can rest assured that your order will be dealt with in a professional and caring way. It is because we control the manufacturing process so precisely that we know your conservatory, windows and doors will be produced with great attention to detail.

At Amazon, our products are only manufactured from parts that carry the BS Kitemark.

Our Basingstoke factory also employs a quality control team who check all the materials as they arrive and also approve every Amazon window system or door prior to it leaving. They make sure that all the working parts operate smoothly and efficiently and that all the components match in design.

The BBC Television Centre - designed by Graham Dawbarn and built in 1960 - was the BBC's first purpose built centre for television production. It's situated four miles from central London at Shepherd's Bush (also the location of BBC White City and BBC Worldwide), on a site used for the famous Franco-British Exhibition of 1908.

All features of the building are designed with television production in mind. A distinctive circular main block houses technical areas and equipment together with facilities for artists and administration. Grouped around are studios linked by a covered walkway to a scenery block, allowing swift movement of scenery and props.

Amazon undertook the replacement of over 500 casement windows to various buildings including the television centre, and numerous secondary glazing projects with specialist acoustic sound proofing to the recording studios.

There were several major considerations whilst draughting the proposal for this fitment:

- 1 The products had to follow a strict colour scheme and sliding design that was safe to use.
- 2 The first floor suffers from extremes of thermal gain during the summers creating discomfort for the students and staff.
- 3 The height of the rooms meant that the top windows were unreachable.

The solution was to produce and install a major curtain walling whereby all external walls were made up of interlinking windows and thermal panels with an integrated operating system to access all windows. This unique walling provided functionality and thermal protection in a robust yet flexible installation.

This modern highly glazed building is set on the main Frimley Green Road near Camberley.

Amazon has replaced a majority of the windows, doors and vertical walling products in a mix of silver anodised and white polyester powder coated aluminium incorporating Pilkington anti-sun solar control float glass as the building suffers from high solar gain during the warmer months of the year.

Darren and Trudi **Location Basingstoke**

These customers had bought products from Amazon previously in their two previous houses and they felt it was natural to involve Amazon in their decision in buying a new home with the intention of a large refurbishment. They requested Amazon to attend a meeting prior to them exchanging on the property to discuss all the possibilities and use Amazon's extensive experience to suggest how the build would look and the timescales involved. After these meetings the decision was made to buy the property and use the services of Amazon to build a large Orangery across the rear of the property. This was in August 2014 and they completed on the property in late September. The next request was that the full build be completed by Christmas. Again Amazon stepped up to this and with its wealth of experience and ability to direct all its trades managed an amazing build in just under 11 weeks. The customers are delighted with the build the space it offers, the quality involved and the speed of which it was constructed without compromising on any quality. Since this build the customers have been promoting Amazon to all their friends and family and we have secured many contracts off those discussions.

we make it work for you

**Mr Sweeney,
Location Hindhead**

Mr Sweeney contracted Amazon to carry out a large Conservatory incorporating its latest Solid Roof Design, the Conservatory itself had many trying contributes including a large opener for Bi-Fold Doors and a roof design that went around the corner of the house. Amazon undertook this contract and delivered an amazing conservatory that boasts all the requirements of the customer. Amazon also delivered this build in the time frame requested.

Peter Ovall

Location Paignton Devon

Mr Ovall had used Amazon on two previous installations and when he bought a new property in Devon he didn't hesitate in contacting Amazon for a quotation, Amazon went to his new property on several occasions until Mr Ovall was completely satisfied with the suggestions and the way forward. Amazon were going to manufacture and install a new Conservatory using their Solid Roof design, Mr Ovall also required a maintenance free area so Amazon undertook the complete replacement of all the decking to the rear of the property up to the conservatory. Again Amazon carried out the installation in quick time making the decision to keep staff in bed and breakfast so they could spend more time on the installation. Mr Ovall has been extremely impressed with the build and recommended many family and friends to use Amazon's services.

Before

After

Dear Andy

The "Amazon Team" have been absolutely brilliant.

Decking and build will be finished tomorrow and it will look "Magnificent" particularly with the sea in the foreground.

Thank you and all your team

Kindest regards

Peter Ovall

JF Builders

Building : Village Hall, Hurstbourne Tarrant, Hampshire.

JF builders have been a customer of Amazon for well over a decade, their brief was to build a new up to date Village Hall for the community. Due to the level of use of the building a commercial product was required but it needed to blend in to the local village feel.

A brown Aluminium product was agreed following many onsite visits with samples to ascertain the correct colour and material. Amazon manufactured and installed all the products required within a tight 4 week deadline. JF Builders and the parish are highly delighted with Amazon's performance and the finished look.

The Amazon Service

When the company was founded in 1989 by its current owner, Andy Shoulder, he instilled into every member of staff from the beginning, his commitment to customer care and to ensure that every customer's experience was as good as it could possibly be.

Over the years, Amazon has continued to grow and support the local community. With a wealth of experience in all aspects of home improvements, Amazon is without doubt the local market leader in the supply and installation of conservatories, windows and doors.

We are proud of the service we offer at Amazon and see it as one of the key factors that separates us from our competitors. This is why there is a link on the homepage of our website to Check-a-Trade so you can see how our customers rate us in their own, unedited words.

Keep up to date with
what's happening at Amazon...
